

## **New Web Site Launch**

**Calgary, Alberta, March 26<sup>th</sup>, 2003.  
For immediate release.**

Net Previa, Canada's premier managed services company, announces the launch of its new website at [www.netprevia.net](http://www.netprevia.net).

"With the new site, Net Previa reinforces its reputation for building, hosting and managing enterprise solutions by extending the depth of services and software offered", says Ian Dew, VP Sales and Marketing.

Services featured include professional services, managed services, and hardware / software sales and leasing.

Net Previa employs highly talented application developers, network / database administrators, user interface experts and security experts all with minimum 10 years of experience in their respective fields. We do software development on various platforms including Windows, Solaris, Linux, Free BSD, Palm OS and VxWorks. Customer service, quality assurance and attention to detail are the corner stones of any Net Previa offering.

Net Previa manages two state of the art, fully redundant Tier 1 data centers in the heart of Calgary, Alberta. Calgary, known as the best wired city in Canada, also has abundant power and no natural disasters. Such a great infrastructure coupled with knowledgeable and dedicated customer service makes Net Previa the most sought after managed services company in Canada.

Net Previa also sells eRSO (electronic Research Services Office), secureDATA (enterprise secure data communication platform), .net ABATIS VPN/Firewall (hardware and software bundle) and DropBox Express (a simple and secure transmission system for transferring large files quickly). eRSO, which has been in development and testing over the past two years, provides new levels of effectiveness and efficiency in the management of the research administration process resulting in higher productivity on the part of researchers and administrative staff.
